Petition Requesting Bill 10 Amendments;
And Voluntary Implementation of Education Guidelines for Best Practices

The best way to provide a welcoming, caring, respectful and safe learning environment in schools is through active parental involvement and participation. A law and education guidelines that expressly and deliberately exclude parents from having a say as to what clubs and activities will take place at their children's schools, the enforced implementation of guidelines that affect the social environment of schools attended by their children, and not informing parents of their children's sexual identification is contrary to achieving this goal. A child's greatest allies are his or her parents, and it is essential parents are informed of the struggles their children are facing with regards to their sexual identity, so parents can support their children going forward.

To the Legislative Assembly of Alberta, in Legislature Assembled:
We, the undersigned residents of Alberta, demand the amendment or full recall of Bill 10, and the voluntary implementation of the Education Guidelines for Best Practices, so as to restore Alberta parental rights to be informed and involved in the development of the social environment and of anti-bullying clubs in Alberta schools, for the benefit of their children.
